1. On-Site Medical Services

We take on all company medical tasks for our customers in accordance with the Occupational Safety Act and DGUV Regulation 2.

We carry out examinations for your employees in accordance with all state and trade association regulations, for example as part of occupational health care (Arb-MedVV of 31.10.2013) or as a suitability examination in accordance with the principles of the DGUV.

Our location in the health center directly at the Leuna Chemical Complex enables a direct connection to doctors from other specialties, including general medicine, internal medicine, gynecology, orthopedics, neurology, surgery, and pediatrics.

1.1. Basic Services

The following services are included in the basic services of the on-site medical service:

- examine customer's employees, assess, and advise them on occupational health, and record and evaluate the examination results
- advising the customer on:
 - the planning, execution, and maintenance of operating facilities and of social and sanitary facilities
 - the procurement of technical work equipment and the introduction of work procedures and working materials
 - the selection and testing of physical protection equipment, work-physiological, work-psychological, and other ergonomic as well as work-hygienic issues, in particular the rhythm of work, working hours and break regulations, the design of workplaces, work processes and the working environment
 - the organization of "first aid" in the company
 - issues relating to job changes and the integration and reintegration of people with disabilities into the work process
- monitoring the implementation of occupational health and safety and accident prevention and in connection therewith to:
 - inspect workplaces at regular intervals and report any deficiencies identified, propose measures to remedy them and work towards their implementation
 - pay attention to the use of personal protective equipment
 - investigate the causes of work-related illnesses, to record and evaluate the results and to propose measures to prevent these illnesses
- to ensure that all employees in the company behave in accordance with the requirements of occupational health and safety and accident prevention, as well as to instruct them about the facilities and measures to avert these dangers and to assist in the planning and training of first aiders and medical support staff.

1.2. Further Services

Further services can be arranged with the on-site medical service:

- examinations in accordance with the German Driver's License Ordinance (FeV) for all motor vehicles (bus, cab, rescue and firefighting vehicles, hazardous materials transporters)
- firefighting fitness, sport boat fitness
- vaccinations and vaccination consultations
- follow-up examinations for workers who have had contact with carcinogenic agents
- examinations under the Youth Employment Protection Act.

1.3. Prevention at Work

We also carry out the following preventive measures, among others:

- health check (laboratory tests, men's check, colon cancer screening, thyroid check, lung function test, hearing test, ECG, stress ECG)
- eye pressure measurement
- resuscitation training for laymen, defibrillator training
- ultrasound examinations of the abdomen, thyroid gland, and vessels
- "intoxication glasses"-campaign
- conduct health days/health passport campaign
- annual flu vaccinations
- support for occupational integration management (BEM)
- advice for addicts in the company
- workshops (e.g., computer workstation, hand hygiene and skin protection)
- lectures (e.g., vaccinations for adults in Germany, travel medicine, driver's license ordinance, sport boat license, truck driver's license, addiction counseling, nutrition counseling).

1.4. Optional Offers as Company Health Management or Private Benefit

Optional services include, for example, ultrasound examinations of the abdomen, thyroid, and blood vessels, travel medical advice and examinations, a sports check and laboratory tests (e.g., blood count, blood sugar, cholesterol, thyroid values, kidney values, liver values, PSA value).

In addition to occupational health care, the on-site medical service advises employees and the general public on travel medicine and travel vaccinations. Appointments can be made by telephone or email. All travel vaccinations, including the yellow fever vaccination, are carried out. We are listed as a yellow fever vaccination center for the state of Saxony-Anhalt.

The on-site medical service carries out sports fitness examinations for employees and the general public. Appointments can also be made by telephone or email.
